## Laugh It Up

People have been laughing and pranking each other on April 1 for years ... decades ... centuries? While the jokes and jests can be very concrete, the history of April Fools' Day is a little harder to pin down. Some historians trace the practice of pranking back to Roman times, while others land its origins in the Middle Ages. Regardless of the holiday's history, if pranking is on your list of April 1 to-dos, please ensure that your joke is safe and fun for everyone!

## Brilliant and Beloved Children's Books

Celebrated annually on April 2, International Children's Book Day promotes a love for reading among children around the globe. The day coincides with the birth anniversary of Danish author Hans Christian Andersen, the creative writer behind beloved stories such as "The Ugly Duckling" and "The Little Mermaid." Celebrate the day by sharing your favorite titles from your own childhood, or better yet, pen a children's story of your own.

## Remember When: The Milkman

Getting fresh milk and dairy products didn't always require a trip to the store. Up until the 1960s, the neighborhood milkman might have delivered glass bottles of milk and other dairy staples to homes several times a week. Neatly outfitted in white uniforms, milkmen became like friends of the family. The convenient service had all but disappeared by the 1970s, but the concept has seen a small revival in the past decade.

## April 2025

## Wild World: Mallard Duck

The most common wild duck in the U.S., the mallard is also thought to be the most abundant and wide-ranging duck in the world. It is found in fresh bodies of water throughout North America, Europe and Asia. Male mallards, called drakes, have a green head, a white neckband and a brown and gray body. Females have mottled brown and white feathers all over their bodies except for an iridescent blue patch on their wings. Mallards are dabbling ducks, meaning they tip their bodies vertically into the water, with their tail in the air, to feed on fish, frogs and plants. Female mallards quack, but males do not; instead, they make a soft, raspy sound.

## Blown Away by Spring

Spring and strong winds often go hand in hand. This is due to shifting atmospheric pressure and temperature changes. According to the World Meteorological Organization, the maximum natural wind gust ever recorded clocked in at 253 mph on April 10, 1996, in Barrow Island, Australia.
